## SCENARIO ANALYSIS

### ● Bearish Case

Below \$90.00, the put sets the floor for the full position (100 of 100 shares). At expiry below \$90.00, downside is protected on the collared shares. Maximum combined loss (at expiry): \$950.00.

### ● Stagnant Case

Between \$90.00 and \$110.00, P&L is primarily driven by the shares for the full position (100 of 100 shares). At expiry in this range, the collar legs expire worthless on the collared shares. Net option premium (total): \$50.00 on 1 contracts received.

### ● Bullish Case

Above \$110.00, upside is limited by the call strike for the full position (100 of 100 shares). At expiry above \$110.00, shares may be called away at the strike and upside is capped on the collared shares. Maximum combined profit (at expiry): \$1,050.00.

## OPTION STRATEGY KEY LEVELS
